

(Mr. DELAY addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GEORGE MILLER) is recognized for 5 minutes.

(Mr. GEORGE MILLER of California addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

THE TRUTH ABOUT SADDAM HUSSEIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

Mr. BURTON of Indiana. Mr. Speaker, there has been a lot of misinformation going around about our good friend, Saddam Hussein, and I think that the American people as well as my colleagues need to know really what is going on, because a lot of people have not been paying attention to this.

For the past decade, Saddam Hussein has violated 16 separate U.N. resolutions. He has failed to account for 26,500 artillery rockets used for delivering nerve gas; he has failed to account for 5,000 artillery shells filled with mustard gas; he has failed to account for more than 3,000 tons of chemicals that could be used as weapons; and he has failed time and time again to honor his agreement on the no-fly zone.

Mr. Speaker, he has enough biological agents to produce 26,000 liters of anthrax, 26,000 liters, 1,200 liters of botulinum toxin, and a whole bunch of others. He has tried to procure uranium for nuclear weaponry, and he has failed to account for nearly 30,000 empty munitions that could be filled with chemical agents.

□ 1915

Yet, there are so many people, after all of these violations, who keep saying, we ought to wait, we ought to wait, we ought to wait. He is connected to the terrorist network. If we are not very careful, if we do not deal with him very quickly, he is going to produce these biological and chemical weapons, he is going to give them to one of his minions in al Qaeda or some other terrorist organization, they are going to come into the United States, and they are going to kill tens or hundreds of thousands of Americans. That is why we need to deal with him very, very expeditiously.

One of the things that concerns me so much is that we do not profit from history. Back in the late 1930s and early 1940s, Hitler, the Chancellor of Germany, said time and again that he wanted peace and he did not want to violate any neutrality treaties, and yet he violated the Treaty of Versailles. He went into the Sudetenland and got an agreement from the European allies

and said that that was all he wanted. And then he went into Poland after violating a nonaggression pact. And then he went into Denmark, and then he went into Norway, and then he went into Sweden, and then he went into Belgium, and then he went into Paris and France. And because the world did not pay attention to what was going on and they did not listen to Winston Churchill, who was the only voice who made any sense, 50 million people died. I want everybody to listen to that: 50 million people died because they did not pay any attention to what Hitler was saying and what he was doing.

Now, Saddam Hussein has at his disposal weapons of mass destruction, and he has hidden them for the past 10 to 12 years; and he has not accounted for them. For us and the Free World to keep our heads in the sand while this is going on is absolutely incredulous.

The President of the United States is doing the right thing. The only thing I would say to the President is if the United Nations does not start forcing him to adhere, Saddam to adhere to those U.N. resolutions, then why talk to them anymore? Mr. President, do what is necessary. Take our troops and invade Iraq from the north and the south, if possible, get rid of Saddam Hussein and his weapons of mass destruction, and send a signal to the world and the terrorists worldwide that we are not going to tolerate them. Do not mess with the U.N. anymore, Mr. President, because they simply are not with it.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. FLAKE). The gentleman is reminded to address his remarks to the Chair.

CONGRATULATIONS TO THE ANOKA TORNADES

(Mr. KENNEDY of Minnesota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KENNEDY of Minnesota. Mr. Speaker, I rise today to congratulate the Anoka Tornadoes on their victory on Saturday, March 8, in the Minnesota State High School Class AA Hockey Tournament.

The Minnesota State High School Hockey Tournament is one of America's preeminent high school sporting events, along with Indiana basketball and Texas football. The tournament was profiled in "Sports Illustrated" some years back. The Tornadoes finished 25-4-1, with a 3-to-1 victory over Roseville in the finals. This is their first State boys' hockey championship and one that will be especially memorable to the 13 seniors who ended their last game together with a victory.

Coached by Todd Manthey and Paul Talbot, both Anoka graduates, the Tornadoes out-shot Roseville 22-to-17 in a game that featured two head coaches

with sons who were senior captains of their respective teams.

Anoka placed four players on the all-tournament team: defenseman and coach's son Tim Manthey, goalie Kyle Olstad, and forwards Ben Hendrick and Sean Fish.

Mr. Speaker, I congratulate these fine students on their championship.

TRIBUTE TO BOYD STEWART

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, on March 16, 2003, my boyfriend, Boyd Stewart, of Olema, California, in Marin County will celebrate his 100th birthday. Born on a dairy ranch in the rural town of Nicasio on March 16, 1903, Mr. Stewart has been active in ranching and community issues his entire life.

After graduating from the Nicasio Elementary School with a student body of 17, Boyd attended Tamalpais High School where he rode a horse to San Geronimo and then boarded the steam train to Mill Valley, where there were cows grazing in the town center. Later, he attended Stanford University, earning money as a relief milker at the Palo Alto dairies and doing far better than his peers who were mowing lawns for cash. He left Stanford to run the family dairy when his father was killed by a horse.

In 1923, Boyd married Joseffa Conrad, a music teacher whom he met on the steps of Tamalpais High School when returning to see a favorite teacher. Joseffa died in 1980 at the age of 78. Today, daughter Jo Ann Stewart, granddaughter Amanda Wisby, and great grandson Stewart Campbell reside at the family ranch where, by the way, the two women run the business.

Over the years, Boyd has been an advocate for progressive ranching practices which many of his peers greeted with skepticism. Early on, he realized that overgrazing could destroy the land they relied on and that sound environmental practices would enhance their work. Boyd worked closely with farm advisors from UC Cooperative Extension and continues to be a strong supporter of measures to preserve the beautiful open spaces of Marin County so that we can preserve agriculture and the community's quality of life.

In 1932, Boyd moved to the present Stewart ranch where he lives in a farmhouse that was built in 1864. In 1935, he began producing grade A milk which meets the purest standards for drinking. His daughter, Jo Ann, took over operations in 1950; and in 1972, the ranch switched from dairy cattle to beef.

Horses have also been a part of the Stewart ranch's operations. In 1976, Boyd won the Morgan Man of the Year Award for establishing a now defunct Morgan horse breeding farm at Point Reyes National Seashore.

As an early supporter of Point Reyes National Seashore, Boyd was an advocate for fair practices for ranchers
